### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Williams et al. (US 2893490) or Rial (US 2525314).

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Williams in view of Rial and Spitz (US 2808110).

Williams discloses a heating apparatus to be located in the production tubing comprising an inner hollow core 11, outer case 10 encapsulating inner core, heat source, and connecting electrical supply, heating apparatus having threaded couplings on each end, compatible with the production tubing, an electrical supply; production fluid is pumped through or flows into inner core, whereby such apparatus heats the production fluid as it is passed through the tubing. Williams does not disclose using perforation in the inner core for production fluid to flow through in order to contact the heater. Rial teaches a similar heating arrangement in

which the fluid is permitted to directly contact the heating elements. Spitz teaches the uses of a perforated casing to permit the passage of production fluid to contact the heater. It would have been obvious to one of ordinary skill in the art at the time the invention was made, in view of Rial and Spitz, to modify the device of Williams to include a perforated inner core within the casing 10 to permit the production fluid to come into direct contact with the heating element since it is shown to be safe by Rial and Spitz and in order to provide greater heat transfer from the heater to the fluid.
